

Traverse™

Traverse™ subwoofers are a great solution to providing excellent, high-output low frequency response and should be considered the cornerstone in subwoofer selections integrating readily with Organ Expressions full-range cabinet selections.

Traverse™ employs a parallel, dual-tuned bandpass cabinet design that raises low frequency efficiency and establishes the power and authority pedal stops produce. Impressive sensitivity specifications and the ability to handle high power levels compliment its musical, dynamic and powerful sound quality.

Traverse™ is recommended as low frequency support in residential applications or in multiple units for houses of worship. Pairing Traverse™ with Organ Expressions Ambience™, Accent™ or Sonority™ provides a powerful, full-spectrum audio system capable of reproducing any style of music with the highest fidelity.

Organ Expression Series™

Traverse™

Architectural Design and Engineering Specifications:

Exterior Finish:	Utility Gray or unfinished Baltic Birch
Exterior Dimensions:	31.75H/23.75W/22.5D
Net Weight:	90 Lbs.
Loudspeakers:	15 inch High-Excursion Woofer
Frequency Dividing:	Bi-Amp Only
Connectors:	5-way Binding Posts with 10 gauge wire capacity
Frequency Range:	30Hz – 125Hz
Sensitivity:	96db (1 Watt/1 Meter)
Power Handling:	800 Watts RMS/1600 Watts Program
Nominal Impedance:	8 Ohms

Traverse: 1/3 Octave Frequency Response Graph (Pending)
